

## OptimalDuct® matches your style

### STANDARD COLOURS

OptimalDuct® is available in Pure white

CW903  
pure white

### PAINTABLE

OptimalDuct® can be painted to blend with any exterior/interior colour palette.

In order to ensure good paint adhesion, we recommend following paint manufacturers' instructions for painting plastics (PVC, ASA, PE, PP).

## Invest in a professional installation, designed for both unitary and split units

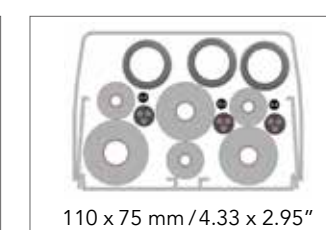

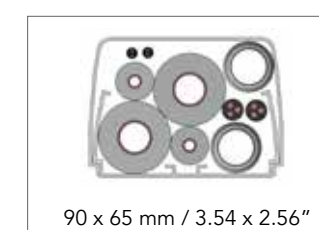

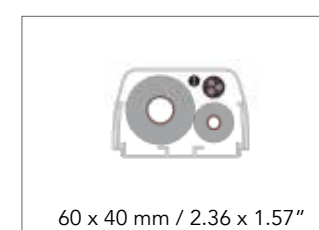

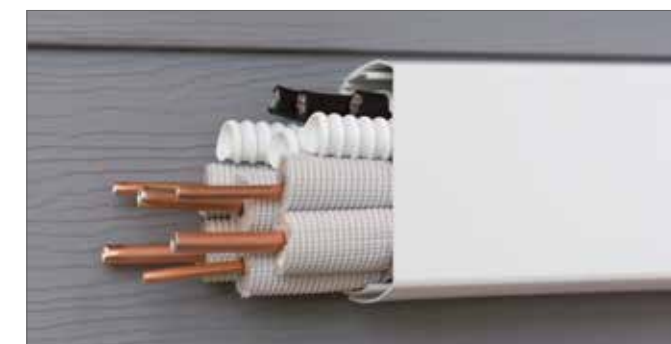

The OptimalDuct® lineset cover system includes a variety of fittings to meet any challenge. The wide range of fittings offers the professional installer a solution for the most difficult installation configurations for either unitary, heat pump and ductless mini-split equipments.

**OptimalDuct® also offers a flush-fitting design.** The bottom half is flat and enables improved in-corner fit eliminating unsightly gaps that create an unsightly appearance.

Subject to any changes - CAT. AIRCO 2019-000.00003.004-v1

## OptimalDuct® comes in 4 different sizes

Depending on installation configurations, ducts' contents may vary.

### Exterior lineset installation
